SECOND ADDRESS IS DELIVERED BY DR. F. D. ADAMS

Second of Series on "Christianity and Problems of Human Life"

THE BIBLE AS AN INSPIRED BOOK

Marked Increase in Attendance Shows That Interest Is Growing

Yesterday afternoon Dean Adams delivered, at Strathcona Hall, the second of a series of addresses on "Christianity and the Problems of Modern Life."

The Dean's lectures are arousing the interest of an increasing number of students; there being a marked increase in attendance over last Sunday.

The subject of the address was "The Inspiration of the Bible." Dean Adams began his address by saying that the highest manifestation of the spirit of God is the Word. Ever since man has had the Bible in its present form, there have been controversies as to whether any or all of it was inspired by God.

It was only at the time of the Reformation that the Bible came into the hands of the people as we have it now. Since that time the idea has grown up that every word was directly inspired by God.

The Dean pointed out very clearly that there are many words inside the covers of our Bible which were not inspired by God, such as the title, the introduction, references and dates.

There have been many translations of the Bible compiled from three sources of equal value. Have we any reason for believing that the Bible as we have it is any more inspired than Wycliffe's translation was?

The convincing argument which shows that the Bible must have been inspired is the fact that although Christ was an obscure man of the first century, we have better accounts of His life than exist of the lives of the great classical writers.

The Dean showed that all the books of the Bible are not inspired to the same degree. There is, however, a progressive teaching or revelation in the Old Testament which reaches its highest development in the person of Christ. This was likened to a "River of Inspiration" which runs throughout our Bible. We must consider such stories as that of "Jonah and the Whale" to be merely images of an obscure people whom we do not understand. We should not let such stories interfere with the main stream of revelation, in which all the saints have quenched their thirst.

Next week, Dean Adams will speak on "Evolution and the Development of Man."

Probably the selections which were most appreciated were those from the programme. Madame Donald sang "Habanera" from Bizet's "Carmen," after which she gave "Mattioli," by Testi. On her second appearance, she sang selections by Bachmanoff, Mozart and Cadman, being afterwards recalled twice. One of her encores, "Coming Thru the Rye," made a hit with the audience.

Mr. A. Kiriloff, the leader of the Balalaika Orchestra, gave a solo on that instrument, for which he was encored.

At the conclusion of the programme, the orchestra played "Tipperary," which was quite unexpected by the audience.

Next Sunday, Miss Alice Verlet, a renowned singer, known as the "Belgian Tetrazzini," will be heard, together with Mr. Robert Maitland, a famous baritone.

On the 7th of February, the pianist, Busoni, will be heard. Busoni has been heard here twice before, and is considered one of the greatest of living pianists. This concert should be well attended.

Highly Favors Proposal Made

Writing to the McGill Daily regarding the proposal to establish a School of Journalism in connection with McGill, Rev. Ernest Manly Taylor, Arts '75, Inspector of Public Schools, Knowlton, Quebec, and a man who has had extensive literary experience, says: "With regard to the proposal to take steps to have a School of Journalism established in connection with the University, I may say that it appears to me as a very desirable undertaking and one which would increase the usefulness of the University."

"I well remember my feeling of uncertainty and trepidation as I composed the prospectus of the first paper ever published at McGill University by students. This was in the spring of 1873. This bore the name of 'The McGill University Gazette.' Its successor was called 'The McGill Gazette.' A bound copy of this first journalistic effort containing the numbers of the year 1873-74 may be found in the Redpath Library."

"If I can in any way aid in the movement for the establishment of a School of Journalism connected with Old McGill I will gladly do so."

BOURKE COCKRAN SEES THE END OF WAR AND STRIFE

Noted American Orator Takes An Optimistic View of Situation

There were very few vacant seats in the spacious Windsor Hall Saturday, when the Hon. Bourke Cockran, United States ex-Congressman, and one of America's foremost orators, rose to address a representative audience of over nine hundred of Montreal's leading citizens on "The War and Civilization."

The meeting, held under the auspices of the St. Patrick's Society, of Montreal, of which Dr. W. G. Kennedy is president, was most successful in every respect. The speaker of the evening in a masterly oration, contrasted the two civilizations, that of the "Camp and that of the 'Workshop'—the civilization of militarism and the civilization which upon the principles of peace, equality and justice.

Cheery optimism marked the speech throughout. In all the dark and gloom of the present European war, Mr. Cockran sees the light of a new civilization in which war and strife do not exist. This terrible war storm is but the bursting of a cloud which has been gathering for years, a cloud of financial depression and gloom.

"This war did not start in July," the speaker said and a loud applause. "It has been raging for fifteen years. But, as so many times in history, when the triumph of justice and peace has been attained only after bloody struggles and noble sacrifices, so in this case will the war be followed by a period of prosperity and advance, the like of which the world has never before seen, and all being well, general disarmament will put a stop to the terrible waste which has plunged the world into financial stringency and depression."

A vote of thanks to the speaker was moved in a few fitting words, by Sir Charles Peers Davidson, and seconded by Dr. J. G. Gairin.

Hon. Charles J. Doherty, Minister of Justice, and a graduate of McGill, was one of the speakers of the evening.

The meeting was of especial interest to McGill men from the fact that Principal Peterson was one of the speakers. In a brief but intensely interesting address, he congratulated Hon. Mr. Cockran on his courageous and optimistic outlook, and also on being ex-cmpt, as a citizen of a neutral country, from the agony through which Canadians are passing. One of the previous speakers of the evening, he said, had been called upon as past president of St. Patrick's Society. He felt that he must have been asked to address the meeting as past president of St. Andrew's Society, to show how the same feeling of patriotism and sacrifice was affecting all sections (Laughter and applause).

He joined heartily with the speaker of the evening, in a fervent desire for

CROSS DOES NOT EXCLUDE SWORD SPEAKER'S VIEW

Man Who Is Fit and Stays at Home Is No Soldier of Christ

DR. MACNAUGHTON VIGOROUS SERMON

Dealt With the Meaning of the Cross and its Place in War

"The Cross of Christ" was the topic of an unusually direct and vigorous sermon delivered at the Strathcona Hall yesterday afternoon, by Professor John Macnaughton. The sermon, intended specially for soldiers, dealt with the meaning of the Christian symbol, and the place of the Cross in war.

Turning first to the New Testament, Professor Macnaughton showed in its writers what may be called a two-fold version of God. They thought of Him as a power in nature, and as a power in the life of man. With the former respect of God, the New Testament is concerned. Jesus, it is true, draws so largely from nature as the open book of God, that Wordsworth has merely copied him in interpreting nature to man. But elsewhere the attitude of the early Christians is one of indifference and even of hostility to nature. God may be visible in nature, but the devil is much more so, and the New Testament looks eagerly forward to the overthrow of the earth and the establishment of a new world.

It is the manifestation of God in the life of men that chiefly concerns the New Testament writers, and here, too, there is a two-fold vision, of the God whom we serve, and of the God before whom we bow down and worship.

God lies at our side in the rags and sores of Lazarus. If we serve not Lazarus, we know not God. God appears for us in a most abhorrent concrete in the rubbish-heap of humiliation and defeat, on the Cross, and unless he brings us up to his side to share the Cross with him, we know not God and he does not save us.

This is Christianity and the whole of it. On the one hand there is God whom we can help, on the other hand, God that can help us. Both of these conceptions of God take shape in man, our brother. If we do not find God in man, we do not find him at all. For service is the only way to God and in worship we assimilate Him, and bring Him to bear a refashioning influence on the universe.

Whether a man smokes, drinks, or plays cards, added the professor, has nothing to do with the question of Christianity, though it may be better for him to do none of these things.

Professor Macnaughton next took up the meaning of the Cross. It has (Continued on page 2.)

MEAN TEMPERATURE SO FAR THIS YEAR HIGHEST RECORDED

McGill Observatory Figures Are Among Highest on Record for January

Figures at the McGill Observatory show that January so far has been one of the mildest on record, with a mean temperature of 19.75 above zero, as compared with the average mean temperature for January during the past forty years of 12.18 above zero.

The average maximum temperature for January in the past forty years is 4.2 above zero, while for the present month to date, the average minimum is 12.48 above zero. The average maximum temperature for January during the past ten years has only passed the present month on two occasions and in both cases the high temperatures were recorded in the latter part of the month. There have been no high temperatures recorded on any particular day of this month of outstanding importance. The mild record is maintained by the average high minimum.

The following table, compiled from McGill Observatory records, shows the mean, maximum and minimum temperatures in January for the past five years, along with the warmest and coldest days:

The final triumph of the "civilization of the workshop," but he said the workshop must have its police when there are rogues and ruffians about. (Loud applause).

The proceeds of the meeting, which should amount to a considerable sum, are to be equally divided between the Belgian Relief and Red Cross Funds.

Dr. John R. Mott's Visit to McGill

There seems to be some doubt in the minds of a number of students as to the time of Dr. Mott's visit and as to whom he is to address. In this connection the following statement has been given to the Daily.

For several years vain attempts have been made to persuade John R. Mott to come to address McGill students. His many pressing duties have hitherto prevented his coming. At last, however, a committee, amongst whose number are to be found several governors of the University, has been so fortunate as to secure his presence from January 28-31. With him will come George Irving, Arts '02, and several other fine speakers.

At the meeting to be held in the New High School on the evening of the 28th, Dr. Mott will speak to students exclusively; in fact the sole object of his visit is to address the whole student body of McGill University.

Editors for this issue:—

Moustaches

We note with alarm that the number of men in college endeavouring to grow moustaches is rapidly on the increase. To most of us it is a painful sight to see youths, whose ambitions are far in advance of their hirsute capacities, strive day after day without making any progress, as far as the naked eye can detect.

At the time of writing we have no statistics to show whether the upper lip is as productive as in the older days, when, if we can judge by photographs of our ancestors, there were fertile growths beneath the nose extending both ways to amazing proportions.

Before our wondering eyes there dawns a renaissance of moustaches; but whether it will work itself to its logical conclusion and develop into the flowing beard which marked the Prophet and the Seer, it is difficult at present to say. Perhaps at this point a warning would be apropos. Let us not in this burning zeal for the umbrageous excrescence overstep the bounds of modesty, but keep at least sufficient of our visages free from the overgrowth to supply points of recognition to our admiring friends and relatives.

Closer Relationship

Between the students attending the Theological Colleges affiliated with McGill and those attending McGill itself there has been heretofore fixed a gap, all attempts to bridge which have seemingly failed. The union of the Theological Colleges effected during the session of 1912-13 clearly accomplished great strides towards a larger measure of co-operation among these colleges themselves, but we doubt if it served in any great extent as a means of bringing about a more closer relationship between the theological and other students. There appears to be a tendency on the part of each section as a whole to hold itself separate from the activities of the other. It should not be a very difficult matter to devise some scheme whereby this state of affairs might be bettered.

There will be few who will deny that interest in debating at McGill is at the present time at a very low ebb and we have been led to believe that it was chiefly owing to this that the University was forced to withdraw from the intercollegiate debate this year. There is, we believe, a debating league in existence among the different theological colleges, holding a series of contests throughout the winter months. Could not interest in public speaking in the University itself be revived by the inclusion of a team from each faculty in this league? If this could be accomplished there is no doubt but that the move would serve a double purpose in also bringing about a closer relationship between the students in Theology and those taking courses in other faculties.

Especially at this time is there need for a consolidated and more closely-knit McGill.

McGill Thirty-Six Months Ago

From the McGill Daily of January 18, 1912

A memorable function was held last night at the Place Viger Hotel. The annual medical dinner proved to be in every way the greatest success on record. In point of attendance of undergrads, it was particularly gratifying to note that over 175 were on hand to enjoy themselves and greet Dr. Gardner and the staff.

E. P. Mathewson, a graduate of McGill in Mining, class of 1885, has just been awarded the gold medal of the Institute of Mining and Metallurgy, of London, England, for his eminent services in the advancement of metallurgy generally, and especially in regard to copper.

The first intermediate hockey match took place at the Jubilee Rink last night, between seven and eight o'clock, before a fair crowd of spectators principally French. The score was 3-1 for McGill.

McGill Twenty-Four Months Ago

From the McGill Daily of January 18, 1913

Last night's game was a somewhat disastrous opening to the intercollegiate hockey season, as far as McGill was concerned. Queen's defeated the Red and White in what was a very evenly fought game all through. The game this year was very much the same as the game between these two teams last season, which ended in the same score, except that McGill had the three opposite its name.

The Victorian Order of Nurses is undertaking next week a campaign to raise the funds necessary for the further conduct of the excellent work it has done in the past. It is understood that the students of this university will be approached some day next week. Collectors will be stationed at the college gates to receive student contributions.

Futurities

To-day

1.15 p.m.—Pictures of Boxing and Wrestling teams at Rice's Studio.
8.00 p.m.—McGill-Victoria hockey game at the Arena.
8.15 p.m.—Political Economy Club in C.O.T.C. Armoury.

Tuesday

8.00 p.m.—Meeting of McGill Physical Society at the Macdonald Physics Building.
8.00 p.m.—Meeting of Medical Dinner Committee in Reading Room of New Medical Building.

Registration Figures at Queen's University Give Total of 1,949 Students

Of These, However, 753 Are Extra-Mural Students — McGill's Grand Total for Session of 1914-15 is 1,425—408 Students in Freshman Year Here

Registration figures announced at Queen's University, Kingston, for the session of 1914-15 up to December 31, give the number of students enrolled there as 1,949, an advance of 524 over the grand total of students in attendance at McGill. It might be well to point out that in the Queen's figures there are included some 753 students not actually attending the university, but taking extra mural courses, such as banking.

For purposes of comparison, the latest statement obtainable at the Registrar's office, McGill, is appended. This does not include the enrollment in theology.

QUEEN'S UNIVERSITY.

Total registration of students for the session of 1914-15 up to December 31:

Notices

SKATING PARTY.

The first of the annual Y. M. C. A., Y. W. C. A. skating parties, will be held on the campus rink next Wednesday evening. A cordial invitation is extended to all students of the second and third years.

McGILL PHYSICAL SOCIETY.

The next meeting of the above society will be held in the Macdonald Physics Building on Tuesday, January 19, at 5 p.m. The agenda will be: (1) The Coolidge Röntgen Tube, with demonstration, by Dr. Pirie. (2) The Hydrogen Röntgen Tube, by Dr. Eve. All are cordially invited to be present.

UNDERGRADUATE ORCHESTRA.

Owing to the fact that Mr. Williams, on the sick list, the Undergraduate Orchestra rehearsal will be postponed until Thursday night. Will all the members try and be present then, as there is only one more regular rehearsal before the Senior play, and our next Sunday concert.

J. DEAN ROBINSON.

MEDICAL DINNER.

There will be a meeting of the Medical Dinner Committee in the Reading Room of the new Medical Building, on Tuesday, at 5 p.m.

CROSS DOES NOT EXCLUDE SWORD, SPEAKER'S VIEW

(Continued from page 1.)

become for us so noble and dignified a symbol that its tremendous paradox escapes us. We must bear in mind that the Cross of the New Testament corresponds to the gibbet of later times, for us a symbol of infamy.

In the mind of St. Paul, the Cross is the one place where God is to be found. Paul, the head boy in the school of Gamaliel, the great theologian, master of the Pentateuch and the rabbinical writings, careful observer of the traditions, pulled an our like a galley slave, but no wind came to fill his sails and drive him blithely over the sea; he was plunging on blindly in a laborious boat. It was not Gamaliel, nor any doctor of divinity, who drew him to the firm land, but a rustic, destitute of books, learning, scornfully contemptuous of the elements of theological knowledge and above all, one whose life had ended on the gibbet. What was it that made Paul fall so deep in love with the shame of the Cross?

He did not see in the Cross the scornful triumph of the cold iron universe over the eager day dreams of a perfect world; and the puny snatches of a man to reach it.

propaganda of intellectual and moral paralysis, a cheap way of escaping eternal punishment, a sleeping-car ticket to heaven for those who could simply bring themselves to believe that it is so. His view is that the Cross cannot possibly do good to anyone who does not share and repeat it.

He did not see in the Cross the final verdict of damnatory justice. He saw, it is true, the exaction of the price of sin, but of the sin of the world, the wickedness for which Christ suffered—a terrific exhibition of eternal righteousness, of sin paid for to the uttermost farthing. He saw not only the wrath of the Cross in the eternal rejection of the universe against evil, but also its love; not defeat, but victory; not weakness, but power; not death, but life through death. In the nailed hand, he saw the Almighty God, the God of redemption of a new creation, which, through the Cross, would fashion a new heaven and a new earth. "Are we not miserable little creatures to be so afraid of our own souls?" asked the professor. St. Paul's vision was the salvation of the world, the reign of justice. He cared not for the assurance that he would escape personal damnation. He would cheerfully accept damnation if that would avail for the salvation of the people. Paul was not content that he should leave the world as he had found it. Man was far from having reached the lordship over his birth-right. Proudly disatisfied with himself, the men he knew, with the established order of society, it grieved him much to see what man had made of man, and that

SENIOR PLAY WILL BE HELD FEBRUARY 5TH

"Green Stockings" Will Help Support Milk Station

At a meeting of the Senior Play Committee last week, the final arrangements for this year's performance were made. The date set for the presentation of the play is February 5. Motions had already been passed in class meetings to the effect that the proceeds be used in aid of charity, and the University Settlement Milk Station was accordingly chosen as the work to be helped.

Despite the unusual difficulties of arranging hours on account of drilling, the members of the cast are working hard at their parts.

The business managers expect to secure the services of the Students' Orchestra for the event. The unique opportunity offered of helping the Settlement of seeing the Seniors perform and of hearing the Seniors play, will doubtless result in a crowded house. Remember the date—February 5th.

INTERCOLLEGIATE MEETING HELD IN TORONTO ON SAT. PARTY AT R. V. C.

A charming informal skating party was held on Saturday evening, by the resident students of the Royal Victoria College. The guests numbered about forty, and the programme of ten numbers and three extras was greatly enjoyed by all.

The business in splendid condition and a pleasant recreation to the recluses was afforded by the glassy and for the most part unfrequented sheets of ice behind the goal posts. The rink was effectively lighted by torches, which cast a pleasant glow over the scene.

Skating was continued until about eleven o'clock, when a buffet supper was served, after which the rendering of the McGill yell brought the evening to a close.

KEEP IT UP!

At Vancouver, Calista and McGill were the winners in Saturday's senior rugby games, the former beating the newly-formed Argos by 17 to nil and the Collegians trimming the Rowing Club by 35 to nil. As the scores would indicate, neither game was very interesting. The clever combination work of the McGill team was the only feature of the afternoon.

The Argos began their game short-handed and two tries and a goal against them were tallied in the period. In the second half the Argos were assisted by a couple of Y.M.C.A. players and more than held their own. They had the better of the play in this period but could not score and the Cadets put on a couple more tries.

The McGill Rowing Club game was very one-sided, the Oarsmen being utterly unable to stop their opponents. The McGill forwards played a splendid game, their passing rushes being very well done. Helme scored three tries, Bullard two and Letson and Anderson one each, and two of the tries were converted.

"As long as skies are blue, and fields are green, evening mist usher night, night urge the morrow, month follow month with woe, and year wake year to sorrow."

Paul could rest content with the thorn in his flesh, but he could not stand the thought of the futility of life.

"To-morrow, and to-morrow, and to-morrow, creeps in this petty pace from day to day, to the last syllable of recorded time, and all our yesterdays have lighted fools the way to dusty death."

Paul was certain that it was not so. He was not so pessimistic as that. He was confident that there were still unfathomable depths of the universe that would recreate the heart of man.

On the Cross he saw a God who could do things, a principle of movement in the old, cast-iron, petrified world. The Cross was the prophesy of a better order, and the actual principle of the new creation that was to defy the world.

This is the simple gospel of Christ making it worth while for any decent man to live, to make the world fit for God's sons to live in and to improve it by carrying on the Cross.

"Our life here below," said the professor, "is proved to be worth living by the fact that it has in it things that are worth dying for. It contains values that are infinite. Our life contains God."

To do its share of the new creation is the work of each generation, to wage contention with the time's decay, to lift the world out of routine and dull stagnation. This is the creative work that God can only do through us.

This work can only be done by fighting. All history is a fight, and life is a battlefield. The Cross is the only weapon in the warfare, but not in the sense that it excludes the sword. The sword is the shape that the Cross must take at the present moment, in the people of Belgium we see God carrying the Cross before our eyes.

If Paul did not consider the place of the sword, it was from the idea which he shared with the early Christians, that the end of the world was very near, by the sudden and direct intervention of a quite mythical external omnipotence. It was this belief in a sudden destruction that prevented Paul from covering our contingency. To fight for the Kingdom with carnal weapons was not thought of by Jesus and Paul. The reasons are apparent. There was nothing to resist but Rome, which stood for order, law, and peace. Resistance to Rome was not only unchristian, but would have been the silliest thing possible. The first requirement of a Christian is not to be a born fool.

Dr. G. O. Walton Graduate of '73 Dies in B. W. I. Had Practised in the Barbadoes For the Last Forty Years

Word has been received here of the death at his home in the Barbadoes, British West Indies, of Dr. George O'Donnell Walton, well known in Canadian-West Indian circles, and father of Dr. F. C. A. Walton, of Winnipeg. Dr. Walton, who was 71 years of age, graduated from McGill in 1873, and had practised 40 years in Barbadoes. He is survived by four sons, George, chief justice of St. Kitts, B.W.I.; Major H. B. G. of the R.A.M.C. now believed to be at the front; Dr. F. C. A. of Winnipeg and G. H. of Victoria, B.C.

The late Dr. Walton was a Fenian raid veteran, and a prominent Mason.

INTERCOLLEGIATE MEETING HELD IN TORONTO ON SAT.

The Four Universities Have Decided to Look After Their Own Affairs With Regard to Playing Rules, Etc.

University of Toronto, McGill University, Royal Military College and Queen's University were represented at the annual meeting of the Intercollegiate Rugby Football Union, in Toronto, Saturday afternoon.

With regard to the proposal to establish universal rules for all the leagues, the opinion was expressed that the Intercollegiate Union had little desire to entertain any offer for a joint meeting of the delegates from the various "circuits." In other words, the College Union intended to look after its own affairs, including the maintenance of its own code of playing regulations and would leave the rest to look after themselves. There was little enthusiasm about the question of university rules.

The Queen's football organization is up against it. Only four of last year's squad are left at Kingston, the remainder having enlisted for active service. A team will be placed on the field next fall, nevertheless, according to present plans.

The next president will be a McGill man.

VICTORIAS AND OLD MCGILL TO BATTLE AGAIN

Manager Stewart Will Likely Use Same Team That Played Laval Last Week

THREE EXCITING GAMES PROMISED

Laval and Nationals Will Present Two Very Well-Balanced Teams To-night

The McGill hockey team will play its fifth game in the City League series to-night when they meet the first Victorias in the first of the three games scheduled.

This will be the second time these two teams will have come together this season, McGill losing to the Vics on the first encounter by a score of 5 to 1.

The Vics this year have got away to a fine lead and Manager Smith intends that his team shall keep at the top. The M.A.A.A. squad are coming along in championship form and expect to make a big bid for the league honors. The McGill team was unfortunately enough to have to start the season with little training and consequently although they have only lost one game yet they have been in two drawn games, one with the Nationals and one with McGill.

There are three games scheduled for to-night at the Arena, the Vics and McGill clashing in the opening fixture, M.A.A.A. and Shamrocks in the second game, Laval and the Nationals in the last game. This last match should prove the most exciting and closely contested of the evening, the Laval team having a much stronger line-up than that which faced the Nationals on the last occasion.

The McGill squad put in two strenuous practices last week in preparation for their game with the Vics to-night and are confident that they can put up a much better fight than they did two weeks ago.

Manager Stewart will probably use the same men against the Vics as he used against Laval last week with the exception that Rooney, the Quebec player, and Morris will be given a trial. Rooney has been showing up well in the practices. He is a fast skater, handles his stick nicely, and gets the puck right in on the nets before shooting. Morris has been playing great hockey all season but was slightly indisposed last week and was not used but Bill has quite recovered now and will most likely be seen in action on the defence.

The following men will be used: Mann, Montgomery, De Muth, Hall, Morris, Kendall, Parsons, Rainboth, Marson, Andrews and Rooney.

The League standing up to to-night is as follows:

Team	W.	L.	D.
Victorias	4	0	0
Nationals	3	0	1
M. A. A. A.	1	1	2
Laval	2	2	0
McGill	0	4	0
Shamrocks	0	4	0

CORNELL EXPECTS CHAMPIONSHIP IN WRESTLING AGAIN

Coach O'Connell Has a Squad of Ninety-one Trying Out For Positions

With no less than 91 candidates out for the Cornell varsity wrestling team this winter, prospects of a championship are very bright at the present time. Cornell has won the championship of the intercollegiate league during the past three winters and the Red and White expect to repeat this year's success. Coach O'Connell '11 is again in charge of the squad and he has the men working out daily in the gymnasium. Among the candidates out are four of last year's championship team, S. S. Green '13, who was unable to wrestle last winter, is also available this year. There will probably be but three positions open to the large number of candidates at work but there is a possibility of some of the older men being displaced.

Among the material now at work under Coach O'Connell are some of the best candidates Cornell has had in several years. In the 135 lb. class, W. J. Culbertson '15, intercollegiate champion, will undoubtedly place again this year. According to Coach O'Connell, he is showing much better form at the present time than he did at his best last season. T. F. S. Boak '15, captain of last year's team, who won every bout in which he participated during his three years as a varsity wrestler, is lost for the 125 lb. class.

Julius Summitt '14, was intercollegiate champion in the 135 lb. class. A new man will have to be developed to take his place. E. H. Allen '14 is lost to the 145 lb. class. He was an intercollegiate champion. E. J. Galinsky '15, captain of this year's team, is the intercollegiate champion in the 155 lb. class. He is at present above weight, but in splendid shape after the football season. Ray Culbertson '14, is lost to the 175 lb. class. E. W. Klein '14, who wrestled in the heavy-weight class last year, will probably be seen in the 175 lb. class this year.

Coach O'Connell's record in winning four intercollegiate championships for Cornell during the last five years, is a noteworthy one. He produced a championship team in 1910, the year following his graduation from the university. In 1911 after his team had not lost a dual meet all season, Princeton won the intercollegiate when two of Cornell's best wrestlers were unable to compete.

Yale crews will row the University of Pennsylvania in the Schuylkill on April 3, according to a recent university announcement.

Minnesota-Lorin Solon has been elected captain of the football team.

PLAYERS WILL TURN OUT.

Manager Stewart requests that the following players be on hand to-night at 7:15 sharp: Montgomery, Mann, Kendall, De Muth, Morris, Hall, Rainboth, Parsons, Andrews, Marson.

Basketballers Successful in Initial Game

Intermediates Win From Railroad in First Game of Series by Score of 52 to 13

Outclassing their opponents in shooting, combination and defence work, the McGill intermediate basketball team defeated the Railroad Y.M.C.A. quintette by the overwhelming score of 52 points to 13. As the score indicates, the game was one-sided from a spectator's point of view, but it also speaks well for the McGill basketballers. The splendid shooting of the forwards attracted much attention, especially that of Harry Pitts, who scored eleven baskets for Old McGill. For the Railroad boys, Orr was the class of the team, he playing the position of centre in splendid style.

On the whole, Captain Ferguson is to be congratulated on the showing that his team made in their initial game. The line-up is as follows: McGill: Pitts, forward; Robinson, forward; Hyndman, forward; Ulley, forward; Ferguson, centre; Orr, J. Ferguson, guard; Hollingsworth, guard; Kemp, guard; Singleton, guard. Officials—Referee, Mr. A. C. Johnston, timer, H. Singleton, scorer, J. Brown.

BROOKLINE WINS FROM HARVARD IN SWIMMING MEET

Arthur Wales Establishes a New Record in the Plunge for Distance—All Events Close

In a swimming meet in the Brookline tank Tuesday evening, the Brookline Swimming Club defeated the Harvard University swimmers by the score of 44 1-2 points to 8 1-2, and a new record was established. Arthur Wales of the B. S. C. in the plunge for distance event, won 72 feet, breaking the record of 70 feet held by Alfred McCormick. In spite of the fact that the score would not indicate close competition, the meet was keenly contested in every event.

At the first event of Brookline and Hitchcock, of Harvard, swam so closely in the 50-yard dash that the judges were unable to decide the winner of the second place. Again in the 100-yard dash, there was difficulty in deciding third place, as Browning, of Brookline, and Fullerton, of Harvard, swam a dead heat. The summary: Relay race—Won by Brookline (Eld, Handy, M. Prendergast, Dean); second, Harvard (Fullerton, Gibbs, Wentworth, Hitchcock).

Plunge—Won by Wales, Brookline, distance 72 ft; second, Bird, Brookline, distance, 69 ft; third, Davidson, Harvard, distance, 58 ft. 250-yard swim—Won by Dean, Brookline; second, Duffy, Brookline; third, Seeley, Harvard; time, 2m. 49s. 50-yard swim—Won by Handy, Brookline; second, Wentworth, Harvard; third, tie between Browning, Brookline and Fullerton, Harvard; time, 1m. 4s. Diving—Won by Browning, Brookline; second, W. Prendergast, Brookline; third, Blanchard, Harvard.

FIRST YEAR MEDS. ELECT OFFICERS FOR CLASS TEAM

Len Lowry and Walter Rooney Will Hold Positions of Captain and Manager

At a hockey meeting held after the practice on Saturday, "Len" Lowry was elected captain and Walter Rooney, Manager of the class team. There was a good turnout and Manager Rooney expects to have a team that will be hard to beat after it has had some practice. A good turnout is expected at practice on Tuesday from 12 to 1. All men wishing a tryout please be on hand as the team will probably be picked then.

ICE CRICKET NEW WINTER SPORT

Snowshoe and ski straight-away and obstacle races, tobogganing, skating races and contests, fancy skating and an old-time snowball fight between teams of picked "hussies" are some of the attractions at a big carnival to be held at the University of Minnesota on February 2. An ice cricket game between two teams of girls will be another feature out of the ordinary. It is believed that this will be the first time that an exhibition of this sport has been given in the State.

SWIMMERS MADE A FIRST CLASS SHOWING SAT.

Final Arrangements Being Made for the Meet in Toronto at the End of the Month

GEORGE HODGSON IS PRACTICING

Roseburgh, O'Brien, Parsons and Pengelly Are All Going in Excellent Style Now

Great activity was the order of the afternoon on Saturday at the Y.M.C.A. tank. The McGill Swimming Club had many of their representative men out who are training for the big meet to be held with Varsity at Toronto at the end of the present month. Final arrangements concerning the date have not been made, but in all probability the 30th of January will be the date selected as most suitable—the aquatic sports then being in conjunction with the intercollegiate hockey and basketball games.

The practice held by the McGill club Saturday afternoon was by far the most successful this season, both in point of numbers, and in form displayed by the men.

Manager Patterson was present at the practice but did not attempt any work. Patterson's side still bothers him a little and the plunging only serves to aggravate it. Another on-looker was Eric Cushing, of the track team, whom it is hoped will soon be out training with the divers.

George Hodgson does not turn out with the men at the Y.M.C.A. tank, but does all his training at the M.A.A.A. tank and according to reports, is going better than ever this year, especially in the shorter distances.

On Saturday, Roseburgh, O'Brien and Parsons were working out at the plunging and were getting well down towards the end of the tank. No record was kept of their distances, but the men are confident they can beat their last year's record. O'Brien especially is coming on at this event.

Parsons was out diving from the high board and was cutting into the water in a graceful fashion. McGill still needs more men for this event. There is also still a scarcity of men for the back stroke, no one showing up for this at all on Saturday.

Pengelly was in the water during the hour, practising the start and the turns at the end of the tank. He is perfectly at home in the water and is showing all kinds of speed in the sprints. He will, in all probability, swim with Hodgson in the one hundred yard race, which is his best distance. The next practice will be held on Tuesday at 5:15 in the Y.M.C.A. tank, when all candidates are expected to be present.

The following is an article taken from the Toronto "Varsity" in reference to the McGill-Varsity swimming meet.

The visit of the McGill swimming team is close at hand. The McGill men are anxious to have this event held on January 30th, and there will be a meeting at the gymnasium this evening to decide whether that date is acceptable to the Varsity swimmers.

Competition between the two teams will be close and keen this year. Varsity and Crompton will probably come first and second in the 50 yards race, and Wood and Huestis will win in the back race, and diving allowing, McGill a fair number of points on other events, the team race is likely to decide the championship.

On Varsity's side the four men for the team race will be chosen from among Wood, Walker, Tilden, Huestis, Crowe, and Crompton. It is absolutely necessary if Varsity is to win, that these men should turn out, so that the best possible selection can be made. The water polo team will be drawn from Tilden, Brown, Mackay, Peck, Fleming, Kellerher, Crowe, Wood and Jones.

Queen's Ready For First Game

Basketball Team Feels Confident That They Can Give McGill a Good Match

A meeting of the Queen's basketball club was held last week in the executive rooms of the gymnasium. Mr. Stewart Laird was elected captain.

Wednesday night Queen's played the Kingston Y.M.C.A. Honors were evenly divided. Y.M.C.A. won the first game and Queen's the second. Some very snappy playing was exhibited by both teams.

The team has been practising conscientiously every day since the Christmas holidays. They show excellent condition, combined with lots of vim and enthusiasm.

Under the efficient management of Mr. Ralph Hagey, the team is being systematically coached and every player is being given a good chance to work out his position.

The team looks good for an intercollegiate championship. Jimmie Bewas says, "It's the best team seen around here for years."

What our boys need is confidence in themselves and support from the student body. Our basketball team, during the past couple of years, has suffered for the lack of interest shown by Queen's. Everybody who has the interest of Queen's at heart, should turn out to the practices and exhibition games and encourage our five.

An exhibition game with the Y.M.C.A. will probably be arranged for Tuesday night, Jan. 19. Notices will be posted later.

The team will be picked from the following: Stew. Laird, "Pete" Prowse, Frank Smith, Don Roach, Red Reid, Mills, Dyer, Laing, Hill, Patterson, Harris, Keill.

Kicking goal after touchdown seems to be about as satisfactory as the position kicking match, has proved to be.

PICTURES AT RICE'S.

Will the executive of the Boxing, Wrestling and Fencing Club, together with Coaches McCarthy and Smith, be at Rice's studio to-day, at 1.15, to have a group picture taken for the Annual.

American Team Was No Match For Varsity

Visitors' Play Was Too Much of Individual Variety to Prove Very Effective

Yale University made their first appearance in Canada on Saturday, when Toronto Varsity defeated them by the score of 3 to 2. Some 2,500 spectators gathered at the Arena to see the blue and white take the measure of the Americans.

Varsity used their regular senior line-up with a new man at right wing in Matthews.

The game was played in two periods, the first under N. H. A. rules, and the second under O. H. A. Three minutes after the start, Jupp broke away and scored for Varsity. Yale being on the defensive most of the time. Yale was playing a nice combination game, but Jupp checked back. They are lively skaters and handle their sticks well. Sandercock broke away alone and scored the second one for Varsity in three minutes.

Macdonald, the Yale centre player, surprised the fans by driving in a long shot from near centre, that easily beat Levesque.

Varsity, 3, Yale, 1. First half over. In the second half, Yale started to flash some real hockey, using their bodies, and Varsity sat up and took note. The crowd was with them on account of the way they were trying but they could not score.

Game over, Varsity, 3, Yale, 2.

Sport Items

Yale opened the intercollegiate league season last week by defeating Pennsylvania, 37-27. Yale led throughout the game, taking a lead at the start and never losing it. The Ellis showed a powerful attack and broke through the visitor's defence in fifteen baskets from the field. Kinney and McNicholas were the individual stars in goal shooting.

The first half ended with the score 13-13 in favor of Yale. The second part of the second period Pennsylvania spotted but the removal of Evans for exceeding the limit of personal fouls weakened the Red and Blue and stopped its rally. Smith of Yale was also punished from the game.

Sewanee will have no Varsity basketball this year, her activities in this direction being confined to contests between fraternity and non-fraternity teams.

The leaders of that English battalion of football players need not fear their men will get offside too much.

The New York Rowing Association added \$1,000 to its treasury for the next Decoration Day regatta by a recent entertainment.

Penn. and Yale varsity eight's coached by Vivian and Guy Nickalls, will row a match race over the Schuylkill river course on April 3, next.

Not content with the world's championship baseball team, Boston saw Harvard produce a never-defeated football team and give Yale the worst drubbing it ever received. The Harvard management offered \$175,000 from its football games. The coach's salary is \$10,000.

Michigan—According to authentic sources, Harvard will drop Michigan from the football schedule next year.

Northwestern—Dean Holgate blames the women of the institution for the successive defeats met by the football team. "Let the football players alone."

The University of Wisconsin is to have a new concrete stadium, with modern locker and bathing facilities, in connection, if the plans of the department of physical education at that institution are carried out.

California-Stanford—Stanford beat the California soccer team in two games for the championship. California forfeited the third.

Annapolis, by clever team work in which Adams and Smith excelled, defeated West Virginia Wesleyan, 44 to 18, at basketball Wednesday.

Dartmouth will play one big football game in Boston next fall. The management has completed arrangements with the University of Pennsylvania for Fenway Park, Saturday, Nov. 6, and leaving French, chairman of the athletic council of Dartmouth, has contracted with the Fenway Park management for the use of the baseball grounds.

Pennsylvania has not played in Boston since 1904. When they defeated Harvard in the Stadium, 11 to 0. On the Penn. team that year was the great quarterback Stevenson, Smith and Ziegler.

The Penn eleven had a poor season last year, but with efforts now being made to build up the coaching staff and with the help of the men who played on the freshman team eleven last fall, it is expected Penn. will make it very interesting for Dartmouth.

Dartmouth defeated Princeton in a fast hockey game at the Arena, Thursday, by a score of 4 to 1. During the first ten minutes of play the two teams appeared very evenly matched and neither was able to penetrate the other's defence. Then the Dartmouth team got together and scored three goals during an interval of three minutes. With less than four minutes to play, J. Humphreys shot Princeton's first goal. In the second half, the players of both teams appeared tired. Dartmouth being content to play a defensive game. Holmes secured another goal for Dartmouth when the period was three quarters gone. Murchie and Holmes were each ruled off the ice twice for slugging.

INDOOR TRACK MEET WILL BE HELD IN GYM.

Definitely Decided That Gymn. Classes Will Hold a Meet First Week in February

VERMONT HASN'T REPLIED AS YET

Although Approached With Regard to Intercollegiate Meet No Reply Yet Received

It has been definitely decided to hold an Indoor Track Meet at McGill in connection with the gymnasium classes conducted by Mr. Lamb for McGill students at the Y.M.C.A. The date has not yet been definitely decided upon but it will be during the first week of February. This will give all men intending to compete three weeks in which to train. This ought to be ample time for the athletes to perfect their condition.

Although Vermont has been approached in regard to an intercollegiate Indoor Meet no reply has yet been received from them. The meet on the first of February being purely limited to McGill students.

Plenty of enthusiasm is being shown by those in whose hands the arrangements for the meet have been left and the committee is looking forward to a very successful programme. The events will be the usual indoor events, sprints, shot put, jumps, etc. There will also be one of two features in the form of class relay races which ought to produce keen competition between the different classes and at the same time prove a very exciting form of events.

All those who intend to enter in the Indoor Meet should be in the Y.M.C.A. Mondays, Wednesdays and Saturdays at the McGill hours to train for their different events.

DONALDAS BASKETBALL TEAM PLAYS AT MACDONALD

Victorias Lose to Macdonald College Girls in Strongly Contested Game on Saturday

The initial matches in the Mount Royal Ladies' Basketball Series were played on Saturday at Macdonald College.

The first were Macdonald College first team and Victorias. The match was keenly contested from the beginning and ended in the Macdonald College students having slightly the better of the Victorias, beating them by 16-13.

The game between R. V. C. Alumnae and the McGill School of Physical Education was somewhat one-sided, the latter team breaking away from the R. V. C. Alumnae and maintaining their lead all the way through the game. The final score was 30-13. The Alumnae team stiffened up greatly in the second half and their combination was superior to that of the Physical Educationists, but on the whole, were weaker than their opponents, and the score of 30-13 is really indicative of the relative merits of the two teams.

The following are the teams in the two sections of the M. R. B. L.:

A. TEAMS.
(1) Macdonald College Women students.
(2) Women teachers of Montreal Protestant Schools.
(3) R. V. C. Alumnae.
(4) Victorias.
(5) McGill School of Physical Education.

B. TEAMS.
(1) Macdonald College Women students.
(2) Women teachers of the Montreal Protestant schools.
(3) McGill School of Physical Education.

The remaining matches of the schedule are as follows:
Jan. 23rd (Gymnasium will depend on the result of above match).
Y.—Macdonald College vs. Teachers.
Z.—Victorias vs. R.V.C. Alumnae.
Bye—McGill School of Physical Education.

Jan. 30—Semi-final.
Winners of Z vs. Losers of Y.
Final—McGill School of Physical Education vs. Winners of Y.
Losers of Z vs. place.
Losers of semi-final, 4th place.
Winners of semi-final, 3rd place.
Losers of final, 2nd place.
Winners of final, 1st place.

B. Teams.
Jan. 23—At Victoria school, at 2:30 sharp.
Y.—McGill School of Physical Education vs. Teachers.
Y.—Macdonald College vs. Victorias.
Jan. 30—(Place depends on result of X).
Z—a Winners of X vs. Winners of Y.
Zb—Losers of X vs. Losers of Y.

INTERCOLLEGIATE CLUB IS FOUNDED IN WESTERN CITY

Will Serve College Men With Luncheon at Moderate Prices

Dr. Norman Kerr, Med. '89, and now in practice in Chicago, addresses a letter to the McGill Daily, calling attention to the establishment in that city, of an intercollegiate club, promoted by the secretaries of the various Alumni Associations of Chicago for the use and benefit of all Chicago college men. Its purpose is to furnish a luncheon at a moderate price in surroundings congenial to the college man. The club has secured quarters in the new Morrison Hotel, Clark and Madison streets, where any McGill

men visiting Chicago will receive a cordial welcome. Dr. Kerr is secretary of the McGill University Alumni Association, Chicago.

Cigarette

This is not a new idea—it has long been the accepted "proper thing" with discriminating smokers.

These Cigarettes are made in three blends; they are positively hand-made and always fresh. This means that you get the real full aroma of the blend, which is lost in goods stocked for any length of time. The three blends are:—

No. 1 Extra Quality Egyptian Blend . . \$2.50 per 100
No. 2 Extra Quality Egyptian Blend . . \$1.50 per 100
No. 1 Virginia \$1.50 per 100

Packed, 50s or 100s, plain, cork or straw tips.

Your name or initials printed on each cigarette in gold, blue or black, 50c additional per 100, but in 500 lots, no charge for printing.

When you are down town call in, or phone and a representative will be glad to show you our range of samples.

Victor Michaels,

Main 71. 112 St. Peter St.

War Summary

Specially Written for the McGill Daily

FRANCE.

In Saturday's war summary there was a report of the splendid charge made by the British forces in France. It was not known until later that this magnificent charge was made by a Canadian regiment. The Princess Patricia's were the ones that made the brilliant showing. On Wednesday morning, January 13, the British had gathered a big force at Bethune, expecting an attack at any moment.

The Canadians waited in vain for the Germans to leave their trenches and finally forced the issue themselves by making a bayonet charge. They drove the enemy from the trenches they held and killed many of them while retreating.

According to the latest despatches, the artillery duel, which has been going on for several days near Soissons, is still in progress. It has been made impossible for the Germans to cross the river Aisne by pontoons or otherwise. This has been effected by a judicious placing of the Allies' heavy artillery. The Aisne is still very high, and the surrounding country is inundated. Due to this, artillery fighting is the only kind practicable in this locality.

GERMANY.

The Germans made an attack on the French positions to the northeast of Arras. In this attack they were repulsed by the French, who made a fierce counter-attack, which resulted in the capture of two German trenches.

The German War Office reports that thirty-five French guns were captured in the Argonne forest.

There is no doubt now that the Germans are contemplating another rush on Paris. Ten German army corps have been rushed to positions along the Aisne and north to Arras. These troops are of the best and have been taken from the positions along the Meuse and from Flanders.

MARINE.

It is reported in a despatch from Amsterdam, dated January 16, that the Allies' warships have driven the Germans from all the Belgian coast cities. Although the Allies have not yet occupied all the evacuated territory it is certain that the Germans have definitely withdrawn.

McGILL MEN WITH HIGHLANDERS AT SALISBURY PLAIN

Lieuts. Lindsay, Horsey and
Morrow, Well Known Here

MEMBERS OF SENIOR YEAR

Volunteered at Outbreak of the
War

The Saturday evening issue of the Montreal Standard showed a photograph of the officers of the Fifth Royal Highlanders, Montreal, now at Salisbury Plain, which is of particular interest to the students of McGill, and especially to the members of the senior science year, for among the officers shown were Lieuts. S. B. Lindsay, C. M. Horsey, and J. C. Morrow, all of whom were members of this class.

These three men were among the first to volunteer for active service when the war broke out and secured commissions with the Highlanders, with which regiment they had been formerly connected.

The men were general favorites with all their class mates, and the best wishes of all the men who knew them will follow them to the battle front where they will take their place in defence of England's honor. That they will do so with no small credit to themselves and to McGill, their Alma Mater, goes without saying; for they are men who "do things."

MILITARY ENGINEERING.

There will be no lecture in Military Engineering (401) on Tuesday, January 19th, and Captain Bessy from Ottawa, will lecture on "Tactics and interpretation of finished maps," on Thursday, 21st inst., in Military Field Engineering (400).

INTELLIGENCE OF STUDENTS TESTED EXPERIMENTALLY

American Expert Compares Answers of Students at University of Illinois

An unique test, originated by a European scholar for the purpose of determining the average intelligence of a student, is being carried on among the University of Illinois students, by Wilfred S. Miller, secretary of the department of education. In the process, students are requested to give, in one word, the effect produced by another word which is the cause.

Out of a class of 100 freshmen students there were sixty-five different answers given for the effect which is produced by "Age." The test was then given to thirty seniors and juniors and they added fifteen more words. Such answers were given to this word as "sickness," "death" and "oldness."

The object of this test is primarily to obtain the average intelligence of high school students, but Mr. Miller is using the University students to get a standard for this experiment.

DELTA SIGMA HOLDS FRESHIE-SOPHOMORE DEBATE JANUARY 20

On Wednesday, January 20, at 3 o'clock, the Freshie-Sophomore debate will be held in the Common Room of the R.V.C.

The subject is, "Resolved that the Romans had a greater influence on civilization than the Greeks." The Freshies, represented by Miss S. Cameron and Miss L. Urd, will uphold the affirmative, and the Sophomores, with

A Net Profit of \$1196.03

---VS---

A Net Loss of \$125.04

THE 1913-14 McGill Daily figures appearing in the Chartered Accountants' Report on the "Students' Council General Revenue and Expenditure Account" show a net profit of \$1196.03. Have you ever wondered how a loss of \$125.04--the figures for the 1912-13 Session--could have been changed to such a gain?

This has been made possible only by the Advertising Revenue. The McGill Daily is to-day conceded to be one of the best College Publications in America--and it is the Revenue derived from the Advertising Columns which admits of its constant improvement.

Every week-day morning the McGill Daily appears promptly on schedule. Two thousand readers eagerly anticipate its coming. This again is made feasible only if finances will permit.

We respectfully request that the Governing Body of McGill University, the officers of Instruction, the Graduates and Undergraduates and, in fact, all our readers do their share.

Remember that every dollar spent with our advertisers is a boost towards the publication of the McGill Daily--the official organ of the Undergraduate Body of McGill University.

--and let the advertising
revenue producers have
your full moral and practical support.

REGIMENTAL DRILL ORDERS WEEK ENDING JANUARY 23

For the convenience of the members of the regiment the drills for the present week have been tabulated by the Daily and are given below. It is essential that all members of the battalion attend their company drills if the high standard of efficiency desired is to be maintained.

MONDAY, JANUARY 18:—
5.15 p.m.—"A" Co. Instructional Drill, Old High School. (C.O.T.C.)

"B" Co. Signalling, Bayonet Fighting (as ordered.)
"C" Co. C.O.T.C. Lecture, Engineering Building.
"D" Co. C.O.T.C. Lecture, Engineering Building.
Recruit Drill, Old High School.

7.00 p.m.—"B" Co. Shooting, Sect. 1, New High School Bldg. Sect. 2, Morgan's.

7.15 p.m.—"B" Co. Aiming Instruction, Sects. 3 and 4, Old High School.

7.45 p.m.—Non-Coms. Class, Old High School.

TUESDAY, JANUARY 19:—

5.15 p.m.—"C" Co. Instructional Drill (C.O.T.C.) Old High Sch. "D" Co. Signalling, Bayonet Fighting, Sects. 13 and 14.

7.15 p.m.—"D" Co. Aiming Instruction, Sects. 3 and 4, Old High School.

7.00 p.m.—"D" Co. Shooting, Sect. 1, New High School Bldg. Sect. 2, Morgan's.

7.45 p.m.—"A" and "B" Company Drill.

WEDNESDAY, JANUARY 20:—

5.15 p.m.—Second Year C.O.T.C. Lecture, Engineering Bldg. Recruits Drill.

THURSDAY, JANUARY 21:—

5.15 p.m.—"A" Co. Signallers, Bayonet Fighting, Sects. 12 and 13.

"A" Co. Musketry, Physics Bldg.

7.00 p.m.—"A" Co. Shooting, Sect. 1, New High School Bldg. Sect. 2, Morgan's.

7.15 p.m.—"A" Co. Aiming Instruction, Sections 4 and 5, New High School.

5.15 p.m.—"B" Co. Instructional Drill (C.O.T.C.) Old High Sch.

7.45 p.m.—"C" Co. Company Drill, Old High School.

"D" Co. Company Drill, Old High School.

FRIDAY, JANUARY 22:—

5.15 p.m.—"A" Co. C.O.T.C. Lecture, Engineering Building.

"B" Co. C.O.T.C. Lecture, Engineering Building.

"C" Co. Signalling, Bayonet Fighting, Sects. 11 and 12, Physics Building.

"D" Co. Instructional Drill (C.O.T.C.) Old High Sch.

7.00 p.m.—"C" Co. Shooting, Sect. 1, New High School Bldg. Sect. 2, Morgan's.

7.15 p.m.—Aiming Instruction, Sects. 3 and 4, Old High Sch.

7.45 p.m.—Non-Coms. Class, Old High School.

SATURDAY, JANUARY 23:—

2.15 p.m.—Battalion parade, Old High Sch. Band will attend.

Musketry Orders

Musketry Instruction to be Taken
Before Men Are Allowed
to Shoot

Shooting at the miniature range will begin on January 24th. Men detailed will attend each evening at the

C. O. T. C. armory, 425 Sherbrooke street, West, at 7 p.m. (Not 6.30 p.m.) and proceed to the range as directed under their section commanders. Uniform need not be worn.

Men who have not previously qualified in musketry with the C.O.T.C. must attend aiming instruction and pass same before being permitted to shoot.

"CONSTANTINOPLE is starving" is a new report from the Levant. Humph. The people can't expect to have food when the troops need ammunition.

Miss M. Fletcher and Miss J. Patton, as speakers, the negative.
Miss Urquhart, Prof. Rose, and Prof. Ladd have very kindly consented to act as judges. The result will be of great importance, as the winning year will take part in the final debate later on against the Juniors, who won the last contest.

SIR DOUGLAS MAWSON LECTURES THIS WEEK

Famous Traveller Will Speak of
His Antarctic Travels and
Adventures

A special luncheon in honor of Sir Douglas Mawson will be given by the Canadian Club on Saturday, January 23rd, the day on which Sir Douglas arrives for his first lecture in Windsor Hall, the same evening.

Sir Douglas will speak on his travels in the Antarctic, where he discovered new land and obtained much information of great value to the scientific world. The tale for this sort of adventure was narrated by Sir Ernest Shackleton on the latter's dash towards the South Pole, and when they returned, Sir Douglas (then Dr.) Mawson immediately laid plans to make a trip on his own account.

WILL DISCUSS ARGUMENTS OF NORMAN ANGELL

Political Economy Club Will
Hold Interesting Session
This Evening

At eight-fifteen this evening, in the C.O.H.C. armory, the Political Economy Club will hold its first regular meeting since the Christmas vacation. The evening will be devoted to the discussion of the theories of Norman Angell regarding the unprofitability of war. Essays will be read by members of the club dealing with the arguments of this noted writer in their general application and also with regard to the present war.

The discussion of Norman Angell's writings is introductory to the taking up of subjects of a similar character at future meetings of the club. These will all be devoted to questions directly connected with the present European conflict and the economic and political issues to which it has given rise. The law of neutrality, the violation of which has been the cause of so much bitterness, and the treatment of neutral commerce, a question of dispute between England and the United States at the present moment, along with discussions on the effect of the war on the trade of Canada and similar topics will be dealt with in turn according to the programme already drawn up.

Beginning to-night, meetings will be held every two weeks until March 29th when the year's schedule comes to an end. On March 1st, an "open" meeting will be held at which some man prominent in the business or financial world will give an address.

'VARSITY STUDENTS' COUNCIL ENLARGED

Oratorical Contest Will Be Held
at V. of T. in February

Chief among the matters brought up before the meeting of the Toronto Students' Council, last Wednesday night, was the question of changing the constitution in order to enlarge the membership of that body.

The amendment which was passed makes the President of the Engineering Society, the President of the Medical Society and one member elected by the Literary and Scientific Society of University College, ex-officio members of the Council. This amendment is to come into effect immediately.

Regarding Theatre Night, the Council empowered the committee to act at its own discretion regarding the choice of a suitable play, and all the arrangements for this event.

It was decided to hold an Oratorical Contest, the suggested date being February 19th. Last year the Oratorical Contest was opened to McMaster University, but it was decided that this year only University of Toronto students shall be eligible.
